

Economic Growth and Carbon Reduction

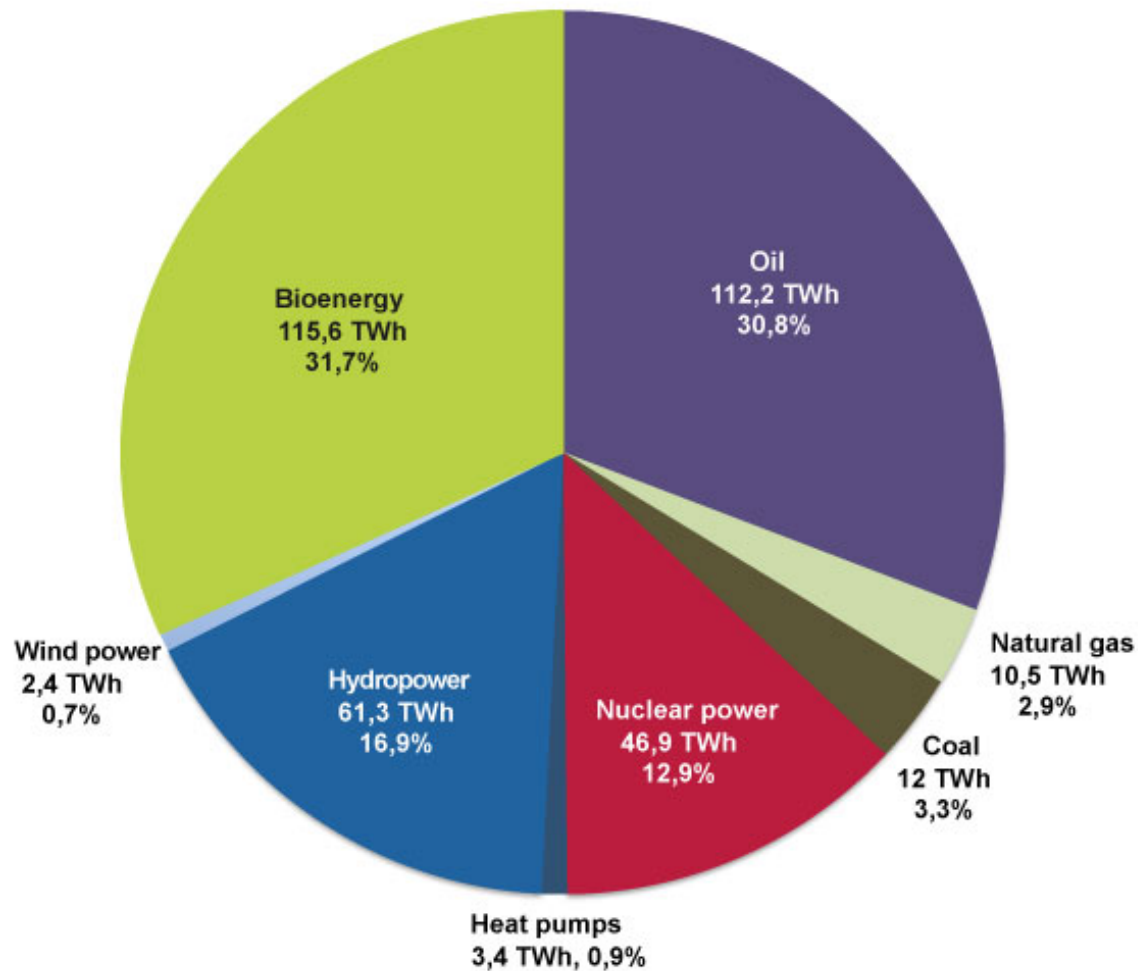

Share of renewable energy in Sweden's energy use

The EU target for Sweden is to increase the share of renewables to 49 percent – with a prescribed trajectory with an increase towards the end. The forecast from Swedish Energy Agency is considerably higher and ends with 50.2 percent in 2020. The real development so far is far ahead of the EU target curve.

Share of final energy use in Sweden 2009

Final Energy use, different energy sources. Calculated by Svebio based on figures from the Swedish Energy Agency "Energimyndighetens kortsiktsprognos" Short term forecast" Marsch 2010.
